

Produce Alert

Tenderstem Broccoli

Excessive rain in Kenya has had a huge impact on the supply of Tenderstem Broccoli. The flooding has meant that many farmers are unable to access their farms or plant new crops & the forecast for the coming week predicts further heavy rain.

Supply has now become a significant challenge and what little we have sourced has raised serious quality concerns. For the foreseeable future we will be substituting all Tenderstem Broccoli orders with Purple Sprouting Broccoli unless you instruct us otherwise.

We will keep you updated with any changes over the forthcoming weeks but please do not hesitate to contact us if you have any queries. Thank you for your understanding.

Quality Produce for Caterers
